

Dear Parent

Responsible use of the Internet

As part of the pupil's curriculum enhancement and the development of ICT skills there is supervised access to the Internet at The Littletons School.

Pupils are able to e-mail one another, and occasionally e-mail other establishments, they research information from museums, and libraries, news providers and other suitable child friendly sites, and teachers use Internet sites as part of the teaching aids available to them.

We have purchased our internet access from an educational supplier that operates a filtering system that restricts access to inappropriate materials. No child will have access to the Internet unless they are supervised by an adult in school.

Should you wish to discuss any aspect of Internet use please contact school to make an appointment.

Yours sincerely

Mrs Helen Brambani
Headteacher
